

Personal injury claims resulting from tractor trailer accidents require prompt action in order to fully protect the victim's rights. That is because the driving logs that tractor trailer drivers must keep, and which they submit to their employer, are usually destroyed after only 6 months. A knowledgeable personal injury attorney will immediately put the tractor trailer company on notice to preserve the logs or suffer the possibility of sanctions at a later time. With the large number of interstate highways that exist in Luzerne, Lackawanna, Monroe and Columbia counties, plus the Northeast Extension of the PA Turnpike, there are a significant number of tractor trailers that are driven on the roads in or near Wilkes-Barre, Scranton, Hazleton, Bloomsburg, Berwick, Stroudsburg and the entire Pocono area. Act promptly to preserve and protect your rights if you suffer injuries in an interstate truck accident
